Agricultural Classification of Land is granted subject to the restrictions set out in F.S. 193.461 (3)(b)

1. In determining whether the use of the land for agricultural purposes is bona fide, the following factors may be taken into consideration:
   a. The length of time the land has been so used.
   b. Whether the use has been continuous.
   c. The purchase price paid.
   d. Size, as it relates to specific agricultural use, but a minimum acreage may not be required for agricultural assessment.
   e. Whether an indicated effort has been made to care sufficiently and adequately for the land in accordance with accepted commercial agricultural practices, including, without limitation, fertilizing, liming, tilling, mowing, reforestding, and other accepted agricultural practices.
   f. Whether the land is under lease and, if so, the effective length, terms, and conditions of the lease.
